    somatic mutations, e313, **e319**, e319f
  oxidative damage to, e319–e320, e319f
  polyploidy, e311–e313
  replication of, e311, e320
  structure of, e311–e313, e312f
Mitochondrial DNA depletion myopathy, **2691**
Mitochondrial DNA diseases, 399f, 400, 400t, **e311**, **e320**
  age-associated, e317–e318
  ataxia, 2571
  clinical features of, e314–e316, e316t
  diabetes mellitus, type 2, e318
  diagnosis of, 2544
  heteroplasmy, e313–e314, e313f
  homoplasmic sequence variation in, **e317**
  homoplasmy, e314
  with large-scale DNA rearrangements, e317t
  maternal inheritance, e313, e313f
  metabolic syndrome, e318
  multiple organ system manifestations of, e311f
  myopathy, 238t, **2690**
    drug-induced, 2695
  neurodegenerative, e318
  phenotypic heterogeneity, e314
  with point mutations, e317t
  prenatal testing for, e320
  pure myopathy syndromes, 2691
  skeletal muscle-central nervous system syndromes, **2691**
  suspected, investigation of, e316–e317, e317f
Mitomycin C
  action of, 521t, 525
  adverse effects of, 521t, 525, 723, 1737, 1814
  for bladder cancer, 591
Mitosis, 385, 387, 410
  segregation of mitochondrial DNA, e313–e314
Mitotane, 527
  for adrenal tumor, 2259
  adverse effects of, 1736, 2213, 2259
  for Cushing's syndrome, 2214
  for ectopic ACTH syndrome, 620
  for medical adrenalectomy, 2259, 2259t
Mitotic spindle inhibitors, 526–527
Mitoxantrone
  action of, 522t, 525, 2619
  adverse effects of, 522t, 525, 2619, e92
  for multiple sclerosis, 2616, 2618t, 2619
  for prostate cancer, 599
Mitral cells, 196
Mitral regurgitation, **1469**
  acute severe, e44–e45
  cardiac catheterization in, 1407f
  cardiogenic shock in, 1702, 1703t, 1706
  chest radiography in, 1471
  clinical features of, 1470
  echocardiography in, 1471, e150V
  electrocardiography in, 1471, e139f, e140f
  etiology of, 1466t, 1469–1470
  in heart failure, 1446
  heart sounds in, 1386, 1470
  hemodynamic patterns in, 1705t
  left atrial compliance in, 1470

Mitral regurgitation (*Cont.*)
left ventriculography in, 1407–1408, 1408f
in Marfan syndrome, 2468
"mitral regurgitation begets mitral regurgitation," 1470
murmur in, 1386–1387, 1470, e43–e46, e43f–e44f, e48, e50
pathophysiology of, 1470
precordial palpation in, 1385
in pregnancy, 45
pulmonary hypertension in, 1580
pulse in, 1383
in rheumatic heart disease, 2094
treatment of, 1468t, 1471–1472, 1471f, 1548
Mitral stenosis, **1465**
cardiac catheterization in, 1406f, 1407, 1467–1468
cardiac output in, 1466
cardiogenic shock in, 1703t
chest radiography in, 1467
clinical features of, 1466–1467
computed tomography imaging in, 1468
diagnosis of, 1467
echocardiography in, 1467, e149V, e150f
electrocardiography in, 1467, e139f, e168f
etiology of, 1465, 1466t
heart sounds in, 1467
hemoptysis in, 227t, 228
left ventriculography in, 1468
magnetic resonance imaging in, 1467
mixed, e139f, e140f
murmur in, 1387, 1467, e43, e43f, e44t, e48, e48f
pathology and pathophysiology of, 1465–1466
in pregnancy, 45
pulmonary changes in, 1467
pulmonary embolism in, 1466
pulmonary hypertension in, 1459, 1467, 1580
pulse in, 1383
rheumatic, 1465
stroke in, 2517t
syncope in, 139t, 141
thrombi and emboli in, 1467
treatment of, 1468–1469, 1468f
medical therapy, 1468, 1468t
mitral valve replacement, 1469, 1469t
mitral valvotomy, 1468–1469, 1469f
Mitral valve
annular calcification, 1465, 1466t, 1469–1470
bicuspid, 1466t
inflow velocity, e152f
Mitral valve prolapse, 1469–1470, **1472**
arrhythmia in, 1472
clinical features of, 1472
echocardiography in, 1472–1473, e150V
electrocardiography in, 1472
heart sounds in, 1472
in Marfan syndrome, 2468
murmur in, 1387, e43–e45, e44t, e45f, e50
palpitations in, 236
in polycystic kidney disease, 1798
treatment of, 1472
Mitral valve replacement, 1469, 1469t, 1479–1480
Mitral valvotomy, 1468–1469, 1469f
Mitral valvuloplasty, 1471
Mittelschmerz, 92t, 307, 307t, 1916, 2328
Mixed connective tissue disease, 2097t, **2106**, 2107t
arrhythmia in, 1417, 1419t, 1420
lymphadenopathy in, 370, 370t
myelitis in, 2593
skin manifestations of, 2106
Mixed glioma, 2604
Mixed gonadal dysgenesis, **2342**, 2342t
Mixed incontinence, 59
Mixed lineage leukemia, 646

adverse effects of, 118, 118t, 135, 135t, 191, 298t, 316, 321, 344–345, 353t, 379t, 1393, 1413, 1417t, 1950, 2578t
for dyspnea, 72
for VIPoma, 2356
Phenotype, 396, 398, 416
Phenotypic heterogeneity, 397, 397t
Phenotypic sex, 2339–2340, 2340f
disorders of, **2342**
Phenotyping
diagnosis of infectious diseases, e102
of lymphoid malignancies, 689–690, 689f
Phenoxybenzamine
action of, 2709f
for hypertension, 1560t

for pheochromocytoma, 2271
for Raynaud's phenomenon, 1573
Phentermine
for metabolic syndrome, 1513
for weight loss, 472
Phentolamine
action of, 2709f
for adrenergic crisis, 1562
for hypertensive emergencies, 1561t, 1562t
for nerve agent exposure, 1357t
Phenylacetate, for urea cycle defects, 2474
Phenylalanine hydroxylase deficiency, 2470
L-Phenylalanine mustard, for multiple myeloma, 705
Phenylbutazones
adverse effects of, 379t, 380t, 664t, 677, 1951t, 2445t
drug interactions of, 36t
Phenylbutyrate, for urea cycle defects, 2474
Phenylephrine
for allergic rhinitis, 2069
for heart failure, 1452t
for neurogenic shock, 1694
Phenylketonuria, 2470, 2471t
genetics of, 398
maternal, 2470
photosensitivity in, 352t
screening for, 2470
skin manifestations of, 325t
treatment of, 2470
Phenylpropanolamine, 38, 860, 2581
Phenytoin
action of, 2504
adverse effects of, 31, 38, 287t, 301, 301t, 320, 321, 327–329, 346–347, 349, 649t, 650, 668t, 689t, 699, 720t, 1489t, 1919t, 2083, 2152t, 2263, 2376, 2507, 2508t, 2563, 2695
dosage of, 31–32
drug interactions of, 29, 36–37, 36t, 860, 863t, 1781, 1863, 1987, 2233, 2508t
for epilepsy, 2507, 2507t, 2508t, 2509–2510, 2602
for hemiballismus, 2563
hepatotoxicity of, 1949, 1951t, 1953
metabolism of, 29t, 35
for multiple sclerosis, 2619–2620
for myotonic dystrophy, 2686
for neuromyotonia, 627
for pain, 84t, 86
for peripheral neuropathy, 2653
for seizures, 1734
for status epilepticus, 1679
for trigeminal neuralgia, 2583
Pheochromocytoma, **2269**
cardiac manifestations of, 1499t, 1500–1501

infectious, 2649
inherited, 2648–2649
neuropathology of, 2649
pathogenesis of, 2647, 2647f
prevention and therapeutics, 2651
prion strains, 2647–2648, 2648t
species barrier, 2648
spectrum of, 2646–2649
sporadic, 2648–2649
synthetic prions, 2648
Prion protein
isoforms of, 2647, 2647f
gene polymorphisms, 2648–2649
structure of, 2646, 2646f
Privacy regulations, e19
Proamatine, for syncope, 143
Proarrhythmia, 1709
Probenecid
action of, 1745
adverse effects of, 262, 263t, 1791t, 2445t
drug interactions of, 36t, 37, 1033t
for gout, 2166
for syphilis, 1044t
Probiotics, 1887
for diarrhea, 818
for gastrointestinal disease, 1835
for indigestion, 245
for inflammatory bowel disease, 1898
for irritable bowel disease, 1902
Procainamide
for accessory pathway-mediated tachycardia, 1435
action of, 1414t
adverse effects of, 31, 35, 38, 668t, 1391, 1395, 1430t, 1489t, 1493, 2083, 2695
for atrial fibrillation, 1429
for cardiac arrest, 1712
dosage of, 1429t
for focal atrial tachycardia, 1433
indications for, 1429t
for malignant hyperthermia, 121
myotoxicity of, 2699
for pharmacologic cardioversion, 1431
pharmacology of, 29t, 31, 1429t
for ventricular tachycardia, 1436–1437
Procaine, 2063
Procaine penicillin
for cellulitis, 883t
for erysipelas, 883t
Procarbazine
action of, 521t, 524
adverse effects of, 521t, 524, 531, 669, 1660t
for CNS lymphoma, 2605
for oligodendroglioma, 2605
Procarcinogens, 31
Procardia, for hypertension, 2582
Procaspase-9, 506
Process (quality theory), e2
Prochlorperazine
adverse effects of, 74, 118, 265, 265t, 664t
for ciguatera poisoning, 2746
for migraine, 99, 100t
for nausea and vomiting, 72, 243, 243t, 484, 530
for vertigo, 146
Procidentia. *See* Rectal prolapse
Procollagen, 2462
Procord, 435t
Proctectomy, for rectal prolapse, 1906
Proctitis, 823t, **833**, 1889
chlamydial, 1071–1072, 1075t
herpes simplex virus, 1098, 1101t
lymphogranuloma venereum, 1072–1073
treatment of, 834
Proctocolectomy, for inflammatory bowel disease, 1898
Proctocolitis, 823t, **833**, 1071
Proctography, 254
Proctosigmoidoscopy, 575
for colorectal cancer screening, 576
Prodrugs, 31, 36
Professional Review Organizations, e9
Progenitor cells, 425, 432f
Progeria, 397
segmental, 55
Progestational agents
for endometrial cancer, 607–608
for ovarian cancer, 606
Progesterone
actions of, 2327
adverse effects of, 243, 294–295, 294t, 298t, 1664t, 2069
for edema, 234
for hypoventilation, 1663
in menstrual cycle, 2328, 2328f
Progesterone receptors, 2191f, 2327
in breast cancer, 567–568
in carcinoma of unknown primary, 615t
Progesterone therapy, for gonadotropin deficiency, 2215
Progestins
adverse effects of, 234t
for osteoporosis, 2405
for perimenopausal symptoms, 2334
for polycystic ovarian syndrome, 306
Proglottid, 1336
Proglucagon, 2188
Prognathism, 215
Progranulin, 2544
Progressive autonomic failure, 2558
Progressive diaphyseal dysplasia, **2412**
Progressive external ophthalmoplegia, 200, 400t, 2674–2675, 2679t, **2690**
with ragged red fibers, **2690**
Progressive familial intrahepatic cholestasis, **1931**, 1931t, 1991
Progressive massive fibrosis, 1614
Progressive multifocal leukoencephalopathy, 2544, **2634**
clinical features of, 2634–2635
diagnosis of, 1308, 1309t, 2635
in HIV infection, 1181, 1183–1184, 1183t, 2635
pathology of, 2634–2635
treatment of, 2635

Progressive myoclonus epilepsy, 2501t
Progressive outer retinal necrosis, in HIV infection, 1185
Progressive supranuclear palsy, 2483, 2537t, **2544**, 2553, 2554t, **2559**, 2577t
  balance disorders in, 153
  diagnosis of, 2650
  falls in, 154
  gait disorders in, 152
Proguanil, e124
  action of, 1290t, e124
  adverse effects of, 1272t, 1290t, 1293
  for malaria, 1272t, 1290t, e124
Prohormone convertase 1, 465, 465t
Proinsulin, 2188, 2354–2355
Project BioShield, 1351
Prokinetic agents
  for bile reflux gastropathy, 1867
  for gastrointestinal disease, 1835
  for indigestion, 245
  for nausea and vomiting, 242, 243t
Prolactin, 2195, **2204**
  action of, 2204
  deficiency of, 2199
  expression and regulation of, 2196f, 2196t, 2204
  secretion of, 2204
  serum, 2203t
  tests of pituitary sufficiency, 2199–2200, 2199t
Prolactinoma, 2205
  clinical features of, 2206
  diagnosis of, 2206
  etiology of, 2206
  in multiple endocrine neoplasia, 2361
  in pregnancy, 2207
  prevalence of, 2206
  screening tests for, 2203t
  treatment of, 2206–2207, 2206f, 2361
Prolactin receptors, 2190, 2204
Prolidase deficiency, 2471t
Proliferating cell nuclear antigen, 481
Proliferative inflammatory atrophy, of prostate, 594
Prolonged assisted circulation, **1457**
  available devices, 1457, 1457f
  goals of, 1457
  results of, 1457
Prolonged QT interval, 1381
Prolymphocytic leukemia, 374, 687t
Promastigote, *Leishmania,* 1296, 1298
Promethazine
  adverse effects of, 353t
  for vertigo, 146, 146t
Prometrium, for polycystic ovarian syndrome, 306
Promonocytes, 382
Promoter (gene), 388
Promoter (carcinogenesis), 488
Promyelocytes, 376, 376f
Promyelocytic leukemia, 447
Pronator drift, 2487
Pronormoblasts, giant, 668, 669f
Proopiomelanocortin, 465, 465t, 466f, 619, 2188, 2197, 2212, 2249–2250
Propafenone
  action of, 1414t
  adverse effects of, 1430t, 2083
  for atrial fibrillation, 1429
  dosage of, 1429t
  indications for, 1429t
  for multifocal atrial tachycardia, 1432
  pharmacology of, 29t, 30, 1429t
  for ventricular tachycardia, 1437
Propantheline bromide, for multiple sclerosis, 2619
Properdin deficiency, 911
Propionibacterium acnes, 1000
  acne vulgaris, 319, 800
  SAPHO syndrome, 2118
  sarcoidosis and, 2135
Propionic acidemia, 2472t
Propionyl-L-carnitine, for intermittent claudication, 1569
Propofol
  adverse effects of, e320
  for delirium, 75, 75t
  for tetanus, 900
Propoxyphene, 2729–2730
Propranolol
  adverse effects of, 1950, 2227, 2307, 2578t
  for aortic dissection, 1566
  for chorea, 2562
  for cocaine overdose, 2733
  for essential tremor, 2560
  for Graves' disease, 2236
  for headache prevention, 106
  for hemiballismus, 2563
  for hypertension, 1560t
  for ischemic heart disease, 1523t
  for migraine prevention, 100, 102t
  for pheochromocytoma, 2271
  for phobic disorders, 2713
  for serotonin syndrome, 2563
  in smokers, 2738t
  for stress disorders, 2714
  for thyroid storm, 2237
  for VIPoma, 2356
Proprioception, 153, 156
Proprotein convertase subtilisin/kexin type 9, 2420
  deficiency of, 2423
Proptosis, 191
Propyldopacetamide, 2709f
Propylene glycol, for distal intestinal obstruction syndrome, 1635
Propylene glycol poisoning, 290, 290t
Propylthiouracil
  adverse effects of, 220, 322, 346, 664t, 2083, 2130, 2152t, 2695
  for Graves' disease, 2236–2237
  for hyperthyroidism, 47
  for internal radionuclide contamination, 1363
  for thyroid storm, 2237
Prosody, 165
Prosopagnosia, **168**, 183
Prospective payment, e9
Prostacyclin, 737, 1365, 1368
  synthesis of, 1856, 1856f
Prostacyclin therapy
  adverse effects of, 1578
  for pulmonary hypertension, 1578–1579, 1578f
Prostaglandin(s)
  biosynthesis of, 1856, 1856f, 2062, 2062f
  in carcinoid syndrome, 2352
  in gastric epithelial defense/repair, 1856, 1856f
  pain and, 81, 82f
  in shock, 1691
Prostaglandin analogues
  for acute renal failure, 1760
  for glaucoma, 186, 190
  for hepatorenal syndrome, 1979
  for peptic ulcer disease, 1862t, 1863
Prostaglandin D_2 synthase, 2062, 2062f
Prostaglandin E_2, 119–120
  ectopic production of, 618t
Prostaglandin endoperoxide synthase-1, 2062
Prostascint scan, 598
Prostate
  anatomy of, 594
  antibacterial properties of secretions, 1821
  benign proliferative disease of, 595, **600**
    acute renal failure in, 1753t, 1755
    clinical features of, 600, 600t
    diagnosis of, 600
    erectile dysfunction in, 297
    treatment of, 66, 600
    urinary incontinence in, 59
    urinary tract obstruction in, 1827t
  proliferative inflammatory atrophy of, 594
Prostate cancer, **593**
  autopsy-detected, 594
  back pain in, 113
  biopsy in, 596
  bone lesions in, 599–600
  cancer predisposition syndromes, 494t
  carcinoma of unknown primary, 615f, 615t, 617
  clinical states of, 594, 594f
  diagnosis of, 594, 595f
  disseminated intravascular coagulation in, 729t
  in elderly, 61
  epidemiology of, 479, 479t, 481f, 482t, 594
  Gleason grading system for, 596–597
  hypocalcemia in, 287t
  late consequences of cancer/cancer therapy, e94
  localized disease, 596–598
  lymphedema in, 1575
  metastatic, 613
    castrate, 599–600
    noncastrate, 598–599
  oncogenes in, 496t
  oncologic emergencies, 1732–1733
  paraneoplastic syndromes in, 618t, 620, 621t, 627
  pathology of, 596
  prevention of, 488–489, 594
  prostate-specific antigen in, 594–596, 598–599
  screening for, 24–26, 25t, 61, 490t, 491, 594
  staging of, 596, 596t
  treatment of, 491, 594, 596–600, 2214
    active surveillance (watchful waiting), 596–598
    antiandrogens, 599–600
    brachytherapy, 597
    chemotherapy, 518t
    gene therapy, 422
    GnRH analogues, 598–599
    hormonal agents, 527, 597–599, 598f
    orchiectomy, 598–599
    pain management, 599–600
    prostatectomy, 597–598
    radiation therapy, 597
    testosterone-lowering agents, 598
  tumor markers in, 483t
  urinary tract obstruction in, 1732, 1827t
Prostatectomy
  adverse effects of, 597
  for benign proliferative disease of prostate, 600
  for prostate cancer, 597–598
Prostate intraepithelial neoplasia, 594, 596
Prostate-specific antigen, 61, 490t, 491
  in carcinoma of unknown primary, 614–615, 615t, 617
  free, 595
  monitoring of androgen therapy, 2324
  in prostate cancer, 594–596, 598–599
  as tumor marker, 483t
Prostate-specific antigen density, 595
Prostatic abscess, 904, 1908
Prostatitis, **1826**
  acute bacterial, 1826, 1826t
  back pain in, 113
  chronic bacterial, 859, 1826, 1826t
  clinical features of, 1826t
  definition of, 1820
  fever in, 130
  herpes simplex virus, 1098
  mycoplasmal, 1069
  nonbacterial, 1826t, 1827
  treatment of, 859, 1826, 1826t
  tumor markers in, 483t
Prosthetic device. *See* Device-related infections
Prosthetic heart valves, 1465, **1479**
  artificial, 1479–1480
  bioprosthetic, 1479–1480
  complications of, 1479
  stroke and, 2522
Prosthetic joint infections, **2174**
  antibiotics for dental procedures, 220
  prevention of, 2174
  treatment of, 2174
Prosthetic valve endocarditis, 789, 790t, 791, 794t, 795–797, 877, 881, 930
Protamine sulfate
  adverse effects of, 2391
  antidote for heparin, 740–742
Protease inhibitors, 1086, 1192t–1193t
  adverse effects of, 2304
  autoprotection of pancreas, 2006
  drug interactions of, 862, 863t, 1033t
  resistance to, 1197f
Proteasomal system abnormalities, 2552f, 2553
Proteasome inhibitors, 505
Proteinase-3, 2120
Protein balance, 454, 459
Protein C, 365, 365f
  deficiency of, 186, 335, 345, 365, 367t, 729, 730t, 732–733, 732t, 745, 764
  elevated, 369
Protein C concentrate, for purpura fulminans, 730
Protein C inhibitor, high levels of, 732t
Protein-calorie malnutrition, 437
  infections in, 750t
  small-intestinal mucosal biopsy in, 1880t
  specialized nutritional support in, 455–456, 458
Protein-energy malnutrition, **450**, 450t, 1768
Protein-losing enteropathy, **1884**
Protein-losing gastropathy, 1872
Protein restriction
  for chronic kidney disease, 1768, 1770
  for dibasic aminoaciduria, 2476
  for hepatic encephalopathy, 1980
  for urea cycle defects, 2474
Protein(s)
  aggregation in neurologic disease, **2482**
  catabolism of, 451
  deficiency of, 322t, 453t
  digestion and absorption of, 1877
  in pleural fluid, 1658
  requirement for, 437
  in specialized nutritional support formulas, 458–459
  synthesis in bacteria, drugs that inhibit, 852t, 853f, 854, 854f
Protein S, 365, 365f
  deficiency of, 186, 364, 367t, 728, 730t, 732–733, 732t, 745
  elevated, 369
Protein starvation, anemia in, 634
Protein truncation test, 405, 406t, 416
Protein tyrosine phosphatase, 500
Proteinuria, 236, 268, **272**
  approach to, 272, 272f
  benign, 1784
  functional or transient, 1784
  glomerular, 272, 272f, 1749, 1758, 1784–1785, 1784t, 1785t
  nephrotic-range, 1785
  nonselective, 1784, 1790
  orthostatic, 1784

Proteinuria (*Cont.*)
in kidney disease, 1758, 1770–1771
in sepsis/septic shock, 1699
sustained, 1784
in systemic lupus erythematosus, 2078
tubular, 272, 272f, 1807t

FIG. 79-6 Genetic testing in a family with cancer predisposition 495

CLINICAL NUTRITION

FIG. 73-1 Decision-making for the implementation of specialized nutrition support (SNS). 456
FIG. 76-1 Basic treatment decisions regarding patients with anorexia or bulimia nervosa 476

EMERGENCY AND CRITICAL CARE

FIG. 216-1 Evacuation in a multicasualties radiologic event . . . 1361
FIG. 216-3 General guidelines for treatment of radiation casualties. 1364
FIG. 261-2 Approach to the patient in shock 1675
FIG. 262-5 Algorithm for the initial management of ARDS . . . 1683
FIG. 266-2 Emergency management of patients with cardiogenic shock, acute pulmonary edema, or both 1704
FIG. 267-3A Cardiac arrest management: ventricular fibrillation 1712
FIG. 267-3B Cardiac arrest management: bradyarrhythmia/asystole 1712
FIG. 269-4 Prognostication of outcome in comatose survivors. 1723

ENDOCRINOLOGY AND METABOLISM

FIG. 50-2 The evaluation and differential diagnosis of hirsutism 303
FIG. 333-6 Management of prolactinoma. 2206
FIG. 333-7 Management of adult growth hormone (GH) deficiency 2209
FIG. 333-9 Management of acromegaly 2211
FIG. 333-10 Management of Cushing's syndrome 2214
FIG. 333-11 Management of a nonfunctioning pituitary mass 2216
FIG. 336-7 Evaluating patients suspected of having Cushing's syndrome. 2256
FIG. 336-10 Diagnostic flowchart for evaluating patients with possible mineralocorticoid excess states 2261
FIG. 336-12 Diagnostic flowchart for evaluating patients with suspected adrenal insufficiency 2264
FIG. 338-11 Screening for microalbuminuria. 2288
FIG. 338-12 Dyslipidemia management in diabetes. 2291
FIG. 338-14 Essential elements in comprehensive diabetes care of type 2 diabetes 2299
FIG. 338-15 Glycemic management of type 2 diabetes 2302
FIG. 339-2 Hypoglycemia-associated autonomic failure in insulin-deficient diabetes. 2307
FIG. 339-3 Diagnostic approach to a patient with documented or suspected hypoglycemia 2309
FIG. 340-5 Evaluation of gynecomastia. 2319

FIG. 340-6 Evaluation of hypogonadism 2320
FIG. 347-6 The evaluation of patients with hypercalcemia . . . 2389
FIG. 351-3 Algorithm for screening for HFE-associated hemochromatosis. 2433

GASTROENTEROLOGY AND HEPATOLOGY

FIG. 38-1 Approach to the patient with dysphagia 240
FIG. 40-2 Management of acute diarrhea. 249
FIG. 40-3 Management of chronic diarrhea. 252
FIG. 40-4 Management of constipation 254
FIG. 42-1 Management of acute upper gastrointestinal bleeding 259
FIG. 42-2 Management of acute lower gastrointestinal bleeding 260
FIG. 43-1 Evaluation of the patient with jaundice. 262
FIG. 287-12 Overview of new-onset dyspepsia 1865
FIG. 295-1 Algorithm for evaluation of abnormal liver tests 1922
FIG. 296-1 Algorithm for the evaluation of chronically abnormal liver tests 1924
FIG. 301-3 Treatment algorithm for alcoholic hepatitis 1971
FIG. 302-1 Management of recurrent variceal hemorrhage . . . 1977
FIG. 302-3 Treatment of refractory ascites. 1979
FIG. 306-1 An approach to the patient with suspected chronic pancreatitis 2004

HEMATOLOGY AND ONCOLOGY

FIG. 58-17 The physiologic classification of anemia 361
FIG. 58-18 An approach to diagnosing patients with polycythemia. 363
FIG. 82-2 The diagnosis and treatment of febrile neutropenic patients 539
FIG. 84-1 Evaluation of a patient with cervical adenopathy 549
FIG. 85-2 Algorithm for evaluation of solitary pulmonary nodule (SPN) 558
FIG. 86-1 Approach to palpable breast mass 564
FIG. 86-2 The "triple diagnosis" technique in suspected breast cancer. 564
FIG. 86-3 Management of a breast cyst 564
FIG. 86-4 Approaches to abnormalities detected by mammogram. 565
FIG. 88-1 Treatment approach to patients with hepatocellular carcinoma 583
FIG. 91-2 The diagnostic evaluation of men with prostate disorders. 595
FIG. 95-2 Treatment algorithm for adenocarcinoma and poorly differentiated adenocarcinoma CUP 616
FIG. 95-3 Treatment algorithm for squamous cell CUP 616
FIG. 99-3 Pathophysiology of sickle cell crisis 637
FIG. 104-2 The therapy of newly diagnosed chronic myeloid leukemia. 681
FIG. 109-2 Evaluating the thrombocytopenic patient. 720
FIG. 112-1 Classification of antithrombotic drugs. 736
FIG. 270-2 Management of cancer patients with back pain. . . . 1733
FIG. 270-4 Management of patients at high risk for the tumor lysis syndrome 1737

INFECTIOUS DISEASES AND HIV/AIDS

FIG. 118-4 The diagnostic use of TEE and TTE in infective endocarditis 793
FIG. 121-3 The management of patients with intraabdominal abscesses using percutaneous drainage 811
FIG. 122-1 The approach to patients with community-acquired infectious diarrhea or bacterial food poisoning. 815
FIG. 144-1 Schematic of the relationships between colonization with *Helicobacter pylori* and diseases of the upper gastrointestinal tract among persons in developed countries 947
FIG. 144-2 The management of *Helicobacter pylori* infection . . . 948
FIG. 166-2 Algorithm for the treatment of the various acute or chronic manifestations of Lyme borreliosis. 1058
FIG. 182-30 The acute HIV infection. 1169
FIG. 182-34 The evaluation of diarrhea in patient with HIV infection. 1176
FIG. 188-4 Rabies postexposure prophylaxis. 1225

NEPHROLOGY

FIG. 46-1 The clinical approach to hyponatremia 278
FIG. 46-2 The clinical approach to hypernatremia. 280
FIG. 46-3 The clinical approach to hypokalemia 282
FIG. 46-4 The clinical approach to hyperkalemia. 284
FIG. 49-2 The evaluation and management of patients with ED. 298
FIG. 276-2 A typical algorithm for early posttransplant care of the kidney recipient 1780
FIG. 283-1 Diagnostic approach for urinary tract obstruction in unexplained renal failure 1829

NEUROLOGY AND PSYCHIATRY

FIG. 363-2 Evaluation of the adult patient with a seizure 2505
FIG. 363-3 Pharmacologic treatment of generalized tonic-clonic status epilepticus in adults 2511
FIG. 364-1 Medical management of stroke and TIA 2514
FIG. 366-4 Treatment approach to newly diagnosed idiopathic Parkinson's Disease. 2554
FIG. 375-4 Therapeutic decision-making for multiple sclerosis. 2618
FIG. 376-1 The management of patients with suspected CNS infections 2622
FIG. 376-2 The pathophysiology of the neurologic complications of bacterial meningitis. 2624
FIG. 379-1 Approach to the evaluation of peripheral neuropathies. 2652

FIG. 379-2 Diagnostic approach to Charcot-Marie-Tooth disease (CMT) 2664
FIG. 381-2 The management of myasthenia gravis 2676
FIG. 386-1 Medical management of major depressive disorder 2717

PULMONARY

FIG. 33-3 The evaluation of the patient with dyspnea 224
FIG. 34-1 Management of cough lasting longer than 3 weeks 226
FIG. 34-2 The evaluation of nonmassive hemoptysis 228
FIG. 244-1 The workup of a patient with unexplained pulmonary hypertension 1576
FIG. 244-2 The selection of optimal drug treatment of a patient with pulmonary arterial hypertension 1577
FIG. 246-5 A diagnostic approach to the patient with hypoxemia 1591
FIG. 252-2 A diagnostic approach to bronchiectasis 1630
FIG. 256-1 How to decide whether diagnostic imaging is needed in suspected PTE and DVT 1652
FIG. 256-4 Imaging tests to diagnose DVT and PE 1655
FIG. 256-5 Acute management of pulmonary thromboembolism 1655
FIG. 257-1 Approach to the diagnosis of pleural effusions 1658

SYSTEMIC PRESENTATIONS

FIG. 16-6 Algorithms for management of acute low back pain, age ≥ 18 years 114
FIG. 11-2 Common and uncommon clinical courses in the last days of terminally ill patients 78
FIG. 19-1 Approach to the patient with classic fever of unknown origins 133
FIG. 21-1 Approach to the patient with syncope 142
FIG. 23-3 The initial workup of a patient with weakness 149
FIG. 30-4 An algorithm for the approach to hearing loss 201
FIG. 57-1 An algorithm for the diagnosis of a patient with photosensitivity 354
